

F O L D E R P 7 0 0

After just a week's use, you will be wondering how you ever did without the Frama Folder P700.

Say good-bye to end-of-the-day stress, monotonous hand work, imprecise folding and unnecessary costs. The Frama Folder P700 pays for itself, even with just a few sheets to fold per day, or when you send out larger mailings with invoices and/or when you produce your own advertising and information materials.

But what makes it tremendous in this price class, are the three folding modes. The Frama Folder P700 is capable of more than just stack work. In the Daily Post mode it can simultaneously fold up to four sheets, and staple them too. In batch mode, it assembles and serially counts, a convenient feature when you need 50 copies for each sales team member for customer hand-outs, for example.

Added value for the office workday: 5 types of folds, 4 formats, including A3

“Standard” office mail is one thing, but you want more: Assemble advertising and information materials in series: flyers, brochures for promotions and exhibitions, enclosures for your mailings, information sheets and much more.

It is also possible to fold large formats up to DIN A3 or invoices with an attached payment slip.

No “ifs”, “ands” or “buts” for the Frama Folder P700 when it comes to quality, versatility and performance – all of which guarantees you rapid progress in every task.

Compare the Frama Folder P700 with its competitors and you'll find that there is no better solution for the hectic office workday at this price.

The Frama Folder P700 is designed to be extraordinarily user-friendly. Unpack it, turn it on and experience your enthusiasm growing for this all-rounder.

Set just once for consistent, precise folding that is guaranteed to stay that way. The result: no readjustment needed during large, same-format runs.

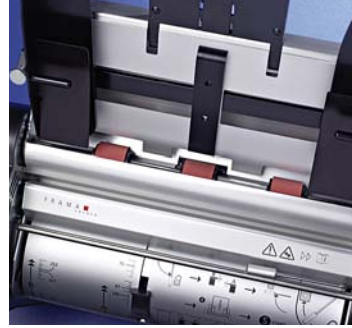

Thanks to its dependable electronics, the control panel for selecting folding mode's and the LCD display with clear pre-select and piece count information makes it easy and convenient to use.

Constant folding quality, even with varying paper weights, is automatically assured through Swiss quality and innovations such as the Frama SingleFeed.

The Frama Folder P700 renders impeccable service for handling special and large formats up to DIN A3.

The Frama Folder P700 stands out through the years in hard everyday use. Toughness is assured by special durable LongLifeRollers™ that offer an excellent grip for varying paper quality.

LongLifeRollers

The stylishly and simply designed Frama Folder P700 does more than just leave a good impression in the office. It helps you impress your customers and business partners with professionally produced printed materials.

 - 440 mm wide × 390 mm deep × 450 mm high
 - Weight: 9.5 kg

Frama

Frama AG, founded in 1970, has always been characterised by progressive evolution towards greater convenience, enhanced intelligence and constant improvement.

Up until the end of the eighties, we manufactured mechanical masterpieces – robust franking machines that provided trouble-free service for decades. Since then we have incrementally and systematically replaced mechanical components with electronics for simpler and more cost-effective operation. At the same time we have developed comprehensive modular solutions with great development potential; they grow along with the tasks they are given, offering you ideal investment protection.

Added value

Whether in intelligent, networked franking systems or fully automated integral system solutions, Frama creates added value by uncompromisingly focusing on your needs.

System competence

By concentrating our talent in a single location, we systematically preserve and develop strategic know-how inhouse at our Swiss headquarters.

Quality

All our products and systems are manufactured in Switzerland – according to state-of-the-art technology and unsurpassed quality standards, by highly qualified employees who receive first class training.

Competitive edge

Our unique technological competence gives us the independence, flexibility and speed of response required for a continuous market inflow of benchmarking innovations.

Solutions

Our wide offering of franking and weighing systems is optimally rounded off with supplementary products such as letter openers and folding machines, as well as comprehensive support services.
